Teresa P. Olmsted
Senior Environmental, Safety &
Health Administrator
ITT Aerospace Controls
1200 South Flower Street
Burbank, Ca. 91502WELL INVESTIGATION PROGRAM—SUBSURFACE HYDROGEOLOGIC INVESTIGATION
AT 1200 S. FLOWER ST., BURBANK, CA., (FILE NO. 109.0582)

Reference is made to your letter dated October 29, 1993, containing additional information, in response to the comments in our letter of June 28, 1993, on the supplemental hydrogeological investigation to be conducted at the subject facility. We have reviewed the letter and find that it complies with the items discussed at the September 21, 1993, meeting between you, your consultant Environ, and Board Staff.

Due to the time delay associated with the permitting process, as indicated, and the number of wells to be installed at this time, an extension for the submittal of the final report from the supplemental hydrogeological investigation is granted. Three copies of the technical report containing the results of the supplemental hydrogeological investigation are due to this Regional Board by April 29, 1994. However, the existing ground water monitoring wells must continue to be sampled quarterly and reports submitted. In order to obtain ground water information on a regional basis, quarterly monitoring reports should be submitted according to the following due dates, and sampling should be conducted in the first month of each quarter:

Reporting PeriodReport Due Date

January-March

April 30

April-June

July 30

July-September

October 30

October-December

January 31

Please notify us at least ten days before commencing any field activities, so we may schedule a representative to be present.

Ms. Olmsted
